

Senior Java Backend Developer with 20+ years of experience delivering robust, high-performance backend solutions for enterprise systems. Specialized in Java (7–21), Spring Boot, RESTful APIs, and microservices architecture, with strong knowledge of CI/CD pipelines, system integration, and backend modernization. Proficient in tools like Git, Bitbucket, JIRA, Bamboo, Nexus, and version control systems (SVN, StarTeam). Adept in writing clean, testable code with JUnit, SonarQube, and Fortify to ensure security, scalability, and maintainability. Successfully contributed to mission-critical projects under Agile methodologies. Eager to bring technical depth, delivery focus, and backend development excellence to high-impact teams.

WORK EXPERIENCE

Computer Programmer - Talent Realty**2025 - Present**

- Maintained and enhanced internal web applications used daily by real estate agents and clients, improving backend efficiency and reducing user-reported issues.
- Implemented targeted bug fixes and system updates based on user feedback, increasing platform stability and minimizing downtime across key business operations.
- Supported system reliability by conducting code reviews and regression testing, ensuring smooth deployment of updates across staging and production environments.
- Designed and integrated messaging solutions with Apache Kafka for event-driven systems, and implemented secure communication between microservices using Feign Client.

Career Break - Relocation and Certification**07/2021 - 05/2025**

- Focused on relocating to the U.S. and professional requalification, completing the AWS Certified Cloud Practitioner certification while actively pursuing technical upskilling to prepare for reentry into backend development.

Senior Java Backend Developer - SIS Innov & Tech**10/2016 - 07/2021**

- Delivered backend solutions for banking systems using Java (7–21), Spring Boot, and microservices, supporting large-scale web and mobile applications.
- Designed and deployed RESTful APIs aligned with Bradesco's AMB framework, ensuring secure and scalable integration with Angular-based frontends.
- Applied unit testing with JUnit and enforced code standards through SonarQube and Fortify, increasing code reliability and maintainability.
- Collaborated in Agile squads and supported continuous delivery pipelines using Bamboo, Nexus, Git, and Bitbucket to streamline deployments and reduce manual errors.
- Frequently assigned to complex projects due to technical depth and ability to deliver stable backend code under tight deadlines.

Grupo Contax**10/2012 - 10/2016****IT Coordinator - 10/2015 - 10/2016****Senior Java Backend Developer - 10/2012 - 10/2015**

- Spearheaded the modernization of legacy Struts-based systems, migrating to Spring framework to improve system performance, security posture, and long-term maintainability.
- Managed version control and release workflows using Borland StarTeam and SVN, ensuring codebase integrity and supporting continuous integration practices.
- Championed Agile methodologies to streamline sprint execution, enhance cross-functional collaboration, and ensure timely, high-quality deliveries.
- Bridged technical and business teams to translate requirements into actionable backend solutions, aligning development with evolving client and stakeholder needs.
- Created dynamic reporting solutions using JasperReports and iReport integrated into web applications, and enhanced user experience by implementing AJAX features for responsive, interactive interfaces.

EDUCATION AND CERTIFICATION

-
- **AWS Certified Cloud Practitioner** - Amazon Web Services Training and Certification | Issued on June 10, 2025
 - **Associate Degree in Data Processing Technology** - University Bandeirante of São Paulo (UNIBAN) | 2008

SKILLS AND LANGUAGE

-
- Problem Solving | Attention to Detail | Technical Communication | Collaboration with Cross-Functional Teams | Adaptability | Agile Methodologies | Code Quality Focus | Stakeholder Alignment
 - Java (7–21) | Spring Boot | Spring MVC | Spring Security | RESTful APIs | Microservices Architecture | JSP | Servlets | Struts (Legacy) | JUnit | SonarQube | Fortify | Git | Bitbucket | SVN | Borland StarTeam | Bamboo | Nexus | CI/CD Pipelines | IntelliJ IDEA | Eclipse | JIRA | Confluence | Apache Tomcat | JasperReports | iReport | System Integration | Regression Testing | PDC & CWS Connectors | Windows Server | Java EE
